```
workers <- c("female", "male") # supposing there are two genders to receive pay
salary <- 8500 # assuming this is minimum salary
level <- "A5-F"# level of the female employee

# the code below is for the second condition

for (worker in workers) {
  if (salary > 7500 && salary < 30000) {
    if (worker == "female" && level == "A5-F") {
      cat("---payslip---\n")
      cat("Name: Worker B\n")
      cat(sprintf("Salary: $%s\n", salary))
      cat("Gender: female\n")
      cat("Level: A5-F\n")
      cat("-----\n\n")
    }
  } else {
    cat("Normal employee\n")
  }
}
```

```
## ---payslip---
## Name: Worker B
## Salary: $8500
## Gender: female
## Level: A5-F
## -----
```
